

DEADFAST GREENHOUSE SMOKE GENERATOR

- Kills flying and crawling insects in greenhouses
- No smell or visible deposits after use
- Treats a standard 3m x 2m greenhouse

Deadfast Greenhouse Smoke Generator treats flying insects in a 120m³ area and crawling insects in a 7.5m³ area so one generator is sufficient for a 2 x 3.5 x 1.5m greenhouse.

Instructions for Use

- For best results fumigate in the late afternoon and leave the greenhouse overnight.
- Ensure that the area to be treated is as smoke tight as possible by closing all windows and door entrances, etc. Cover water storage tanks before application.
- Remove the plastic lid and place the generator on the upturned tin on a stable heat-resistant surface (e.g. a plate on a ½ m square of aluminium foil).
- Light the fuse carefully as it may emit some sparks upon ignition and exit the space.
- Exclude all persons and animals for 12 hours and then ventilate thoroughly.
- For severe infestations fumigate 3 times at 5 to 7 day intervals.

STATUTORY CONDITIONS RELATING TO USE

FOR USE ONLY AS AN INSECTICIDE.

FOR AMATEUR AND PROFESSIONAL USE.

Apply at a rate of one generator per 120m³ for flying insects or 7.5m³ crawling insects

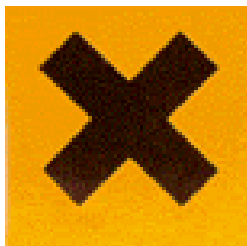

Users must comply in full with all their responsibilities under the Control of Pesticides Regulations 1986 (as amended), including complying with all Conditions of Approval.

READ ALL PRECAUTIONS BEFORE USE.

HSE 9446
