

GROWING SUCCESS NETTLE KILLER ULTRA

Growing Success Nettle Killer Ultra contains glyphosate for effective control of nettles, annual and deep-rooted perennial garden weeds including grasses, docks, willowherb, bindweed and many more.

Nettle Killer Ultra is inactivated on contact with the soil and is broken down by the soil bacteria to leave no soil residues.

INSTRUCTIONS FOR USE

SHAKE WELL BEFORE USE.

- Rotate nozzle to 'spray'. Once spraying is completed, return the nozzle to the off position.
- Spray weeds lightly until wet, but avoid run-off of the liquid.
- Being systemic, Growing Success Nettle Killer Ultra is absorbed by the leaves and distributed throughout the weed, reaching right down to the roots.
- For best effects the nettles should be actively growing and have a large leaf area allowing plenty of weedkiller to be absorbed.
- If it rains within 6 hours of application, then effectiveness may be reduced and re-treatment is recommended.
- Very large and persistent nettles may require repeated treatments once new growth appears.
- Extreme care should be taken to avoid spray drift onto lawns and other desired plants.
- Apply this product carefully. Ensure spraying takes place only when weeds are actively growing (normally March to October) and is confined only to visible weeds including those in the 30cm swath covering the kerb edge and road gully – do not overspray drains.
- The effects of the weedkiller will be seen on some weeds within a few days, but full control can take up to 4 weeks.

MAPP No. 15460

Contains 7.2 g/l (0.72% w/w) glyphosate as a Ready to Use formulation

FOR THE CONTROL OF NETTLES

Treats 35m²

FOR USE ONLY AS A HOME GARDEN WEEDKILLER

TO AVOID RISK TO MAN AND THE ENVIRONMENT, COMPLY WITH INSTRUCTIONS FOR USE

Children and pets need not be excluded from treated areas when dry (not recommended for use on lawns).
