

GROWING SUCCESS DEEP ROOT PATH AND PATIO WEEDKILLER

Ready-to-use Deep Root Path & Patio Weedkiller has been formulated for the control of most annual and perennial weeds such as grasses, nettles, willowherb and dandelions on hard surfaces.

INSTRUCTIONS FOR USE

- Shake sprayer well before use.
- Rotate front spray nozzle 180° clockwise to release safety mechanism.
- Squeeze trigger and apply spray evenly and lightly onto weed leaves until wet, but avoiding run-off of the liquid.
- Avoid contact with desirable plants.
- Do not use on lawns or wanted plants unless you wish to kill them.
- For best results spray April to September when growing conditions are good, onto as large a leaf area as possible thereby allowing for the absorption of plenty of active ingredient.
- Apply this product carefully. Ensure spraying takes place only when weeds are actively growing (normally March to October) and is confined only to visible weeds including those in the 30cm swath covering the kerb edge and road gully – do not overspray drains.
- Systemic action Deep Root Path & Patio Weedkiller is absorbed by the leaf foliage, killing the whole plant including the roots. The effect is visible within days on many weeds but it can take up to 4 weeks on tougher varieties. Very persistent weeds may require repeated treatments on re-growth.
- Avoid walking on treated areas until spray has dried in order to prevent the transfer of weed killer onto lawns.
- If it rains within 6 hours of application then effectiveness may be reduced, so re-treatment is recommended.

TO AVOID RISK TO MAN AND THE ENVIRONMENT, COMPLY WITH INSTRUCTIONS FOR USE.

SAFETY INSTRUCTIONS

KEEP OFF SKIN. WASH OFF SPLASHES (IMMEDIATELY).

WASH HANDS AND EXPOSED SKIN AFTER USE.

Environmental Protection

Do not empty into drains.

Do not contaminate water with the product or its container.
