

2 June 2010

WILLIAM SINCLAIR HOLDINGS PLC

("William Sinclair", the "Company" or the "Group")

INTERIM RESULTS FOR THE SIX MONTHS ENDED 31 MARCH 2010

William Sinclair Holdings PLC is one of the UK's leading producers of commercial horticulture and branded garden products. Its well established brands include J Arthur Bower's, Silvaperl and New Horizon - the leading brand in the fast growing peat free garden compost and organic plant foods sector. William Sinclair's customers include national accounts such as The Garden Centre Group (formerly Wyevale), Wilkinson, Homebase and B&Q as well as an extensive range of independent garden centres.

HIGHLIGHTS

- Revenue of £21.8 million (six months to 31 March 2009: £22.3 million), reflecting a slightly late start to the main selling season this year
- Operating profit of £0.44 million (six months to 31 March 2009: profit of £0.19 million)
- Strong balance sheet with net debt £2.06 million lower than at 31 March 2009
- Increase in interim dividend to 1.5p (six months to 31 March 2009: 1.0p)
- Trade benefiting from actions taken to ensure availability of ample raw materials in a tight market
- Interim agreement reached in March on future of Bolton Fell and initial £9 million compensation received in April
- Good weather has enabled an early start to the peat harvest for the next selling season

Bernard Burns, Chief Executive, William Sinclair Holdings Plc, said: "We have continued to build on the successes of last year and are delighted with a stronger first half performance, which has resulted in a profit in a period that traditionally has been loss making. This improvement has been driven by strong sales of our market leading peat-free New Horizon product. We have also benefited from further operational efficiencies and gains from the Metcalf acquisition coming through. A better peat harvest last year has also meant that we have not had to buy any expensive imported product. Demand in the UK commercial growing sector has been strong with the euro's relative strength to sterling making home grown products more appealing than expensive imports.

"Since the half year end, we have received an advance payment of £9 million compensation from Natural England for Bolton Fell. This opens up a range of opportunities to further improve our efficiency, accelerate our programmes to generate more peat-free products and make the company less weather sensitive. We are working on a number of technology programmes and possible acquisitions that will reinforce our strong position. While still early in the season, trading in April was strong with sales and margins ahead on a like for like basis. Good weather, both in April and May, has allowed an early start to the peat harvest and we are well positioned for the second half of the year."

CHAIRMAN'S STATEMENT

I am pleased to report another period of good progress at William Sinclair with performance for the 6 months ended 31 March 2010 ahead of last year, net debt down, a first half profit and an increase in our interim dividend.

Trading Review

Turnover during the period was £21.8 million. This was a slight decrease from the previous year but the fall is not significant and merely reflects a slightly later start to the main selling season. Margins have improved due to a combination of our self sufficiency in peat this year and internal efficiency improvements in our logistics.

The profit before tax for the half year was £187,000 compared to a loss of £211,000 for the six months to 31 March 2009. This is the first time for many years that the business has recorded a profit in the first half of our financial year, a period where seasonality has a tremendous negative effect. This strong start to the year was mainly due to a strong performance in March reflecting favourable trading conditions in the run up to Easter and higher than expected demand from retailers anxious to replenish low stocks.

The balance sheet remains strong with the Group's net debt at 31 March 2010, when working capital requirements are near their peak, at a modest £15.0 million. This was well within our bank facilities and £2.0 million lower than at the same point last year.

The Directors are recommending an interim dividend of 1.5p per share which is an increase of 50% compared to last year. This is consistent with our intention to pursue a progressive dividend policy which reflects the underlying long term prospects of the group.

Bolton Fell advance payment and investment opportunities

We announced on 23 March that we had reached an interim agreement with Natural England which will lead to the eventual cessation of peat harvesting at Bolton Fell Moss in Cumbria and the acceleration of our programme for peat bog regeneration at the site. The advance payment of £9 million was received in April and will be used, initially, to offset bank borrowings. Longer term we intend to use this cash to facilitate development of an alternative manufacturing and distribution facility which will lead to an even greater advantage over our competitors and further reduction in our market leading carbon footprint.

In addition, we have an acquisition policy targeting growth in existing areas of expertise and securing peat reduced and peat free competitive advantage.

Business Review

Although the poor peat harvest in 2009 caused severe shortages throughout the industry our own self sufficiency, helped by some early success with our synthetic peat from Freeland and encouraging progress with a peat drying project, gave us a considerable advantage.

The award winning New Horizon peat free range continues to lead the market in its sector. A Spring campaign by government to persuade consumers not to use peat based product was also a factor leading to a 44% growth in sales of this product range.

The volatility of the euro versus the pound has given UK growers an advantage, including, in particular, over the Dutch and our commercial customers are busier as a result.

The severe winter weather resulted in the Freeland operation delaying supply of material to a number of large civil projects. This market sector is already depressed by the recession. Horticulture operations coped well in spite of difficulties with transport and we benefited from a drier spell from March onwards. The improved weather since the beginning of March has boosted activity at Freeland and indications are that volumes will increase further with contracts linked to the Olympics.

Outlook

Trading in April was strong with sales and margins ahead on a like for like basis. Good weather, both in April and May, has allowed an early start to the peat harvest and, if normal or better conditions prevail throughout the summer, the Directors are confident that progress can be maintained.

Bill Simpson
Chairman

Notes to the financial information

1. Taxation

The taxation charge / (credit) on ordinary activities is calculated by applying the Directors' best estimate of the full year effective tax rate to the profit / (loss) before taxation.

2. Dividend

A final dividend of 2.5p per share was paid on 18 March 2010 to shareholders on the register on 19 February 2010. An interim dividend of 1.5p per share will be paid on 3 August 2010 to shareholders on the register on 9 July 2010.

3. Earnings per share

Basic earnings per share have been calculated by reference to 16,554,046 (2009: 16,554,046) shares in issue.

4. Basis of preparation

The financial information set out in the interim report has been prepared in accordance with accounting policies under International Financial Reporting Standards as adopted by the European Union ('IFRS') as detailed in the financial statements for the year ended 30 September 2009. These policies are expected to be followed in the financial statements for the year ending 30 September 2010.

The interim report has been approved by the Board of Directors and is neither audited nor reviewed. The interim financial information does not constitute statutory accounts within the meaning of section 434 of the Companies Act 2006.

The financial information for the year ended 30 September 2009 is extracted from the audited accounts for that period. Those accounts have been delivered to the Registrar of Companies. The auditors' report on them was unqualified and did not contain a statement under either section 498(2) or section 498(3) of the Companies Act 2006.

The Group does not consider that any standards or interpretations issued by the International Accounting Standards Board (IASB), but not yet applicable, will have a significant impact on the financial statements for the year ending 30 September 2010.

A copy of this interim report will be posted to shareholders shortly and will be available to view on the Company's website at www.william-sinclair.co.uk.

5. Bolton Fell

On 22 March 2010 the Group signed an agreement with Natural England to facilitate the cessation of peat harvesting from its site at Bolton Fell in Cumbria and to accelerate the process of peat bog regeneration. Under the arrangement Natural England agreed to pay the Group an advance payment of £9 million pending subsequent negotiation of the full extent of compensation due to the Group and have the option to acquire the shares in Boothby and Penicuik Peat Company Limited which holds the majority of the title to the Bolton Fell moss site. This initial payment was made in April 2010 and is not reflected in the financial statements produced above because certain legal conditions had yet to be fulfilled as at 31 March 2010.

William Sinclair's professional advisors calculate the value of the compensation due to the Group to be substantially greater than the £9 million advance payment. In the event that compensation cannot be agreed between the parties before 30 November 2011 the matter can be referred by either side to the Lands Tribunal for a decision. In such circumstances it is possible that payment of further compensation could be delayed by a further year or more.

Under the agreement William Sinclair will implement a phased withdrawal of peat harvesting from Bolton Fell and will greatly accelerate its existing programme of regeneration. William Sinclair's own team will be working closely with environmental experts from Natural England and other agencies to set out new plans to regenerate the peat bog in a practical and structured way. The Group does not expect this agreement to have a significant effect on its 2010 harvest from the site.
